

VMG blades has a long history racing, designing, and building racing yachts, windsurfers, and high performance fins. They have now turned their attention to SUP racing fins.

In conjunction with Team riders Sam Parker, Terrene Black and Beau O'Brian the Mako SUP racing fin was developed. To get the best out of your board, you really need to use a fin which has been designed through detailed analysis of foils, outlines, bend, twist and construction for the specific use of SUP racing.

	Mako TimeTrial	Mako 35	Mako 37	Mako 44
Intended Conditions	Built for speed and tracking Flatwater Closed waters	Built for tight buoy turns Surf / Open waters	Follows the runners Versatile and agile Downwinding	Stabilises your ride Rough water Challenging chop Downwinding
Competition Type	Sprints / Time Trial Harbour / River Marathons	Technical Racing / BOP Downwind Racing	Follows the runners Versatile and agile Downwinding	Challenging Endurance
Specifications	Pure speed racing	Maximum Manoeuvrability	Ultimate downwinding	Rough condition stabiliser
